# Math Live - Patterns: Activity Sheet 

Grade: $4 \quad$ Strand: Patterns and Relations (Patterns) Outcome: 1, 2, 3, 4

1. Tiles are used to make this pattern.
a. Draw the fifth diagram in this pattern.
$\square$

b. This pattern is shown in the following chart. Complete the chart.

| Diagram Number | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Perimeter (units) | 4 | 8 | 12 | 16 |  |  |
| Area (square units) | 1 | 4 | 9 | 16 |  |  |

2. Black and white tiles are used to make this pattern.
a. Draw the next diagram in this pattern.

b. Create a chart to organize the data.

| Diagram Number | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number of Black Squares |  |  |  |  |  |  |
| Number of Total Squares |  |  |  |  |  |  |

3. In an elimination tournament, 64 teams play 32 games, then 32 teams play 16 games, then 16 teams play 8 games and so on.
a. Following this pattern, how many games will 4 teams play? Set up a chart to show the pattern and solve the problem.
b. Extend your chart to include the total number of games played. How many games are played in the entire tournament?

## Math Live - Patterns: Activity Sheet Answer Key

1. Tiles are used to make this pattern.
a. Draw the fifth diagram in this pattern.
$\square$

b. This pattern is shown in the following chart. Complete the chart.

| Diagram Number | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Perimeter (units) | 4 | 8 | 12 | 16 | 20 | 24 |
| Area (square units) | 1 | 4 | 9 | 16 | 25 | 36 |

2. Black and white tiles are used to make this pattern.
a. Draw the next diagram in this pattern.

b. Create a chart to organize the data.

| Diagram Number | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number of Black Squares | 1 | 4 | 9 | 16 | 25 | 36 |
| Number of Total Squares | 6 | 12 | 20 | 30 | 42 | 48 |

3. In an elimination tournament, 64 teams play 32 games, then 32 teams play 16 games, then 16 teams play 8 games and so on.
a. Following this pattern, how many games will 4 teams play? Set up a chart to show the pattern and solve the problem.

| Number of Teams | 64 | 32 | 16 | 8 | 4 | 2 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Number of Games | 32 | 16 | 8 | 4 | 2 | 1 |

b. Extend your chart to include the total number of games played. Then find how many games are played in the tournament.

63 games will be played in total.
