

Math Test Review - Topic 1

- I can use addition, subtraction, division, and multiplication to solve problems.
 - I can use math in real-world situations.
-

1. Write a story problem that requires division to solve. Then write the number sentence that solves the problem.

2. Write a story problem that requires addition to solve. Then write the number sentence that solves the problem.

3. Write a story problem that requires subtraction to solve. Then write the number sentence that solves the problem.

4. Write a story problem that requires multiplication to solve. Then write the number sentence that solves the problem.

5. The Hiawatha train leaves Chicago at 9:25 a.m. The trip to Milwaukee takes 1 hour and 32 minutes. What time does it arrive in Milwaukee?

6. Write a 6-digit number. Write a sentence that uses your number in a real-world example.

7. Explain how to multiply 7×43 in your head.

8. What time zone are we in? What time zone is 2 hours earlier than our time zone?

Use the graph to solve problems 9 & 10.

Trees Planted: 9/1/14 to 9/6/14

→ 1 plant represents 10 plants

Monday	
Tuesday	
Wednesday	
Thursday	
Friday	
Saturday	

9. On which day were the fewest trees planted?

10. How many trees in all were planted on Thursday and Monday?

11. The average number of trees planted for the week was 60. Which day of the week came closest to the average?
